DETAILED ACTION

Drawings

1. The informal drawings are not of sufficient quality to permit examination. Accordingly, replacement drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to this Office action. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action.

Applicant is given a TWO MONTH time period to submit new drawings in compliance with 37 CFR 1.81. Extensions of time may be obtained under the provisions of 37 CFR 1.136(a). Failure to timely submit replacement drawing sheets will result in ABANDONMENT of the application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Long 6,630,153, first published Oct. 31, 2002, as disclosed and claimed.

According to www.surgeryencyclopedia.com, a bone graft is "a surgical procedure that places new bone or a replacement material into spaces between or around broken bone (fractures) or in holes in bone (defects) to aid in healing."

4. Long teaches a bone graft composite comprising a carrier material, and Pamidronate, col. 11 ll. 4-26, "the bone material ... " and "a biological agent ... coated on the surface", further, col. 16 ll. 60-65 ... "biological agent which may be included in the BGS (bone graft substitute) of the present invention is a biphosphate. Examples ... pamidronate."

5. Claims 1-10 are further rejected under 35 U.S.C. 102(b) as being anticipated by Gasper 6,080,779 as disclosed and claimed.

Gasper teaches a compound to be implanted at a bone defect site containing a carrier and Pamdronate. abstract, and col. 18 ll. 44-64.

Gasper further teaches a method comprising the step of inserting at the site of bone destruction a bone graft composite, wherein said bone graft composite replaces diseased bone at the site of bone destruction, col. 5 ll 38-68, col. 6, ll 1-14 ... "representative uses of the compounds and combinations ... included ... repair of bone defects and deficiencies ... "can also be useful in repair ... or surgical resection of bone (for instance, for cancer treatment", the insertion step is preceded by surgical removal of the diseased bone implicit in the phrase "surgical resection", and the bone graft composite comprises Pamidronate, col. 18 ll. 44-64.
